

Leonardo Antero S.P. Yoro

09283525919
yoroleo10@gmail.com
Nueve de Pebrero St., Brgy. Pleasant Hills, Mandaluyong City

A dedicated and goal-oriented BS Information Technology student with hands-on experience in full-stack development, backend systems, database management, API integration, and AI-assisted applications using Python, JavaScript, PHP, SQL, and modern web frameworks, with exposure to OCR, LLM integration, and Docker-based deployments, seeking an on-the-job training opportunity to apply academic knowledge in a real-world environment while further developing skills in software development, system implementation, and technology-driven solutions.

SKILLS

Core Backend & Web Development

- PHP Web Development
- Python (Backend Development, Data Processing)
- Java Application Development
- REST API Development & Integration
- Database Management (SQL)

AI / Machine Learning / NLP

- Machine Learning & NLP (Semantic Search, Prompt Engineering)
- LLM Integration (GPT-based systems)
- BERT-based Text Processing
- Retrieval-Augmented Search Concepts (RAG)
- OCR Processing (Tesseract, EasyOCR, PaddleOCR)

Frontend & Tools (supporting skills)

- HTML, CSS, JavaScript
- React, Flask, Laravel
- Figma (UI/UX Design)
- Git & GitHub Version Control
- Docker (Containerization)

EXPERIENCE

Academic Resource and Knowledge (ARK):An AI- Driven Platform for Enhanced Learning and Knowledge Management

January 2025 - November 2025

- Contributed to the development of a full-stack web-based library management system with AI-enhanced search capabilities.
- Integrated GPT for semantic search and BERT for structured query processing, improving retrieval accuracy beyond basic SQL matching.
- Developed email notification and book recommendation features to enhance system functionality and user experience.
- Assisted in database design, backend structuring, and frontend integration to ensure smooth system performance.
- Led the web deployment of the system, ensuring successful hosting and accessibility.

Synopsis

January 2026 - April 2026

- Contributed to the development of full-stack Viber chat summarization and task tracking system that converts chat screenshots into structured daily reports.
- Implemented OCR processing using EasyOCR and PaddleOCR to extract text from images for downstream analysis.
- Integrated Qwen3.5B LLM for automated summarization and structured HTML-based output generation.
- Utilized Retrieval-Augmented Generation (RAG) concepts with ChromaDB for embedding storage and contextual retrieval to improve summarization relevance and accuracy.
- Led frontend-backend integration and end-to-end pipeline development from OCR extraction to LLM output.
- Deployed the system using Docker to ensure consistent environment setup and application portability.

EDUCATION

Bachelor of Science in Information Technology

José Rizal University

2022 - Present

CERTIFICATIONS

- **CompTIA ITF+ (Information Technology Fundamentals)** - Certified Candidate *December 16, 2022*
- **Pearson Database Certification - Exam Passer** (*May 15, 2024*)
- **AI for Good - AI Singapore (In partnership with Meta)** - Candidate (*May 20, 2025*)
