

LEONARDO ANTERO SP. YORO

FULL-STACK DEVELOPER | API INTEGRATION & AUTOMATION

Pleasant Hills, Mandaluyong 1550, Philippines | yoroleo10@gmail.com | +639283525919 |
<https://www.linkedin.com/in/leonardo-antero-yoro-391475393/>

PROFESSIONAL SUMMARY

Motivated Full-Stack Developer with hands-on experience in AI integration, automation workflows, OCR pipelines, API development, and Dockerized deployments. Skilled in Python, JavaScript, SQL, and LLM integration through academic and internship projects involving semantic search, NLP, and AI-powered systems. Passionate about building scalable applications and practical AI solutions that improve workflows and user experience.

EXPERIENCE

Cornersteel Systems Corporation

AI Integration & Full-Stack Development Intern

Jan 2026 to Apr 2026

Mandaluyong, Metro Manila

- **Engineered an end to end AI powered OCR system using EasyOCR and PaddleOCR** to extract structured data from Viber conversation screenshots for large language model processing and automation workflows.
- **Developed full stack features using React.js REST APIs and SQL databases** to support an AI driven chat summarization and task tracking platform with real time data handling.
- **Designed and implemented a Dockerized deployment architecture** for backend frontend and AI services ensuring scalable and reproducible system deployment.
- **Integrated Qwen large language model with prompt engineering and Retrieval Augmented Generation (RAG)** using ChromaDB to improve summarization accuracy and contextual understanding.

PROJECTS

DocFlow - AI Document Workflow Automation Platform

Full-Stack Developer & AI Integration Engineer

Jun 2026

<https://github.com/LioYoro/lio-ai-project>

- **Built an AI powered document processing system** using OCR embeddings and large language model integration for automated extraction classification and semantic search
- **Implemented a dual OCR pipeline** using Tesseract, PyMuPDF and OpenCV preprocessing to improve scanned document text extraction accuracy
- **Developed semantic search system** using MiniLM embeddings and PostgreSQL pgvector for similarity based document retrieval
- **Dockerized full stack architecture** and integrated Supabase and Render for authentication backend hosting and scalable deployment workflows

ARK (Academic Resource & Knowledge) System - Capstone Project

Full-Stack Developer

Jan 2025 to Nov 2025

https://github.com/LioYoro/HexTech-ARK_Library_System

- **Developed a full stack AI powered academic search system** using natural language processing models for semantic search and recommendation based retrieval
- **Implemented BERT and GPT based ranking models** to improve relevance scoring and search accuracy across academic resources
- **Designed REST APIs and database architecture** to support scalable academic resource management and analytics dashboards

EDUCATION

Bachelor of Science in Information Technology - Cum Laude

José Rizal University

Aug 2022 to Jun 2026

Mandaluyong City

- DOST-SEI Merit Scholar (2022-2026)

CERTIFICATIONS

- Information Technology Fundamentals (ITF+) Certified Candidate, CompTIA; Information Technology Specialist: Database Certification, Pearson; AI for Good - In Partnership with Meta, AI Singapore; Wadhwani Skilling - Employability Skills

SKILLS / TECHNICAL PROFICIENCIES

- **Programming & Backend:** Python, JavaScript, PHP, SQL | **AI / Machine Learning:** LLM Integration, NLP & Semantic Search, AI Automation | **Computer Vision / OCR:** OCR Processing | **DevOps & Deployment:** Docker, DevOps Practices | **Full-Stack Development:** React.js, REST API Integration, Database Management | **Automation & Systems:** Automation Workflows, System Integration, Webhooks, n8n, UIPath
